CMU Research Data Assessment Survey - Short Form

Introduction

The CMU Libraries are undertaking an initiative to facilitate data services at the University including, but not limited to, assisting with data management planning, identifying local and off-site data repositories for research data, and building local infrastructures for data management, documentation, and dissemination.

This survey will help us get a general sense for the type, quantity, and data management status of data held by researchers at CMU. Your participation in this survey is much appreciated and we would be happy to meet with you one-on-one to discuss the details of our initiative and how we can assist you with your research.

Note:
Your participation in this survey is strictly voluntary. You may refuse to participate at all, or choose to stop your participation at any point in the survey without fear of penalty or negative consequence.

The information/data you provide for this survey will be treated confidentially, and all raw data will be kept in a secured file by the surveyor. Results of the survey will be reported as aggregate summary data only, and no individually identifiable information will be presented unless explicit permission is given to do so.

If you have any questions or concerns about this survey, please contact:
