First Progress Report Presentations

- As indicated in the syllabus, they start next week
 - Some of you will have met with your clients, some not
 - Some of you will have a better idea of what your project will be
 - Some will only be guessing based on the client's overview presentation and whatever you've been able to learn on your own
 - That's OK!
 - This is presentation practice, more than a progress report, since you haven't made much progress yet!
-

What I expect in these presentations

- Use your kickoff presentation (final or early draft, whatever you have). I anticipate this will already cover
 - Understanding and defining the problem
 - Assessing the overall issues and objectives
 - Identifying your team's specific contributions to the project
- Add one or more slides if necessary, covering
 - Evaluating the technical knowledge of the client/collaborator
- It's OK if some of this turns out to be wrong later!

What I expect in these presentations

- Each team member should speak for an equal amount of time (or an equal number of slides)
- The entire presentation should take no more than 15 minutes
- There will be time for Q&A of 5 minutes or so
- It's ok if you do not use your full 15 minutes, as long as you are complete.

Presentation Schedule

- I will assign presentation times Thursday or Friday this week
- I will work with Jamie to assign times that make sense for your project
